

Markit Wire for Prime Brokers

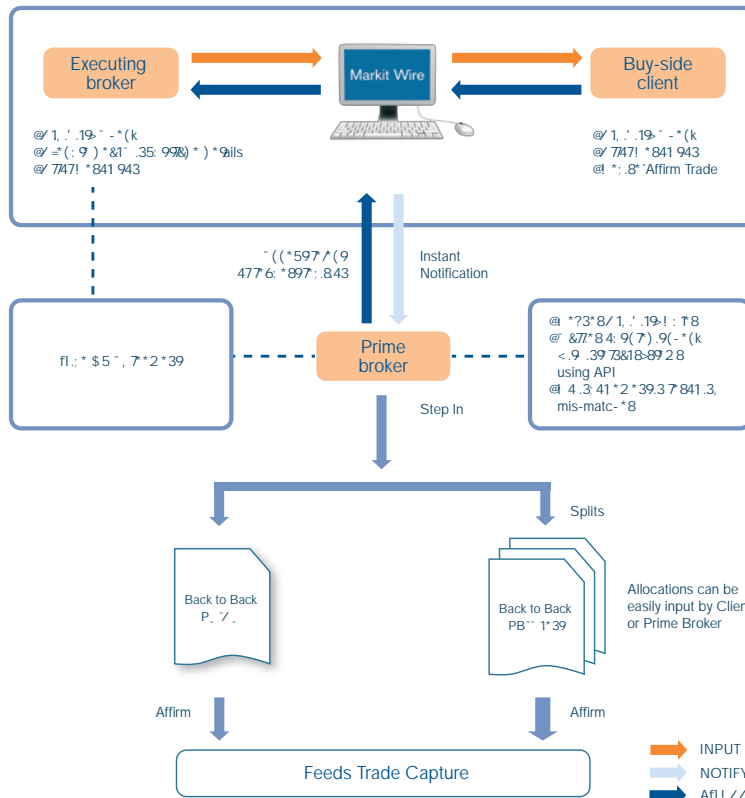

Markit PBWire is the leading solution for processing derivative give-up trades.

It is the only real time tri-lateral system linking the executing broker, buy-side client and prime broker

Features:

- Fully compliant with Give-Up Agreement
- ISDA® compliant
- No need for the prime broker to resolve a trade
- Real-time trade processing
- Instant notification
- Fully compliant with Give-Up Agreement
- ISDA® compliant
- No need for the prime broker to resolve a trade

The Markit PB Wire process

Additional Features

All parties can process trades straight through into risk/trade capture systems, eliminating dual entry and reconciliation. This reduces operational risk and improves efficiency. Markit also provides a range of other services to help you manage your risk and improve your trading performance.

About Markit

Markit is a leading provider of independent, benchmark quality data and services for the derivatives market. We help our clients manage their risk and improve their trading performance. Our services include trade capture, risk management, and settlement operations.

Unique in our data sourcing and services capabilities, Markit is owned and strategically supported by a group of leading financial institutions. This ensures we have the resources and expertise to provide the highest quality services to our clients.

Markit is a global organization managed by seasoned professionals with deep experience in each line of business. We have a strong track record of helping our clients manage their risk and improve their trading performance. Our services are available in all major markets.
